Introduction

Holistic detective with an unwavering commitment to exploring the fundamental interconnectedness of all things. I combine an unconventional investigative approach with a keen intuition for improbable solutions, engaging confidently with the realms of the paranormal, temporal anomalies, and missing cats.

My experience spans peculiar cases involving time travel, quantum uncertainty, and reluctant clients. I thrive in unpredictable environments, leveraging resilience and a penchant for eccentric problem-solving to uncover answers that others overlook.

Work Experience

Present – 2018

Founder & Chief Detective — Holistic Detective Agency

Established and operated a one-of-a-kind agency dedicated to solving mysteries via the interconnectedness of all things.

- Successfully resolved cases involving missing cats, haunted computers, and spontaneously appearing sofas.
- Developed proprietary "luck-based" investigative techniques and pioneered random taxi route methodologies.

2018 – 2017

Quantum Cat Retrieval Specialist – Freelance — Various Clients

- Assisted clients in locating pets lost to quantum uncertainty and other improbable circumstances.
- Collaborated with physicists and veterinarians to develop the Schrödinger Protocol for ambiguous animal recovery.

2017 – 2015

Temporal Anomaly Investigator – Contractor — St. Cedd's College

- Investigated and contained time loops, paradoxes, and chronologically misplaced furniture within the college precincts.
- Published *"A Holistic Guide to Sofa Extraction from Impossible Spaces"* (unofficial circulation).

2016 – 2014

Unconventional Technology Consultant – Part-Time — London

- Provided troubleshooting for haunted answering machines, sentient software, and vintage electronics.
- Implemented holistic diagnostics, improving technology-cohabitation harmony by 47%.

Education

2014 – 2015

MSc in Applied Holistic Sciences — University of Cambridge

Specialised in advanced interconnectedness analytics, time anomaly mitigation, and cross-dimensional case studies.

- Research thesis: *"The Practical Applications of Quantum Uncertainty in Everyday Detection."*
- Elected chair of the Society for Random Investigations and Improvised Solutions.

2011 – 2014

BA (Hons) in Holistic Detection — University of Cambridge

Developed a rigorous understanding of the fundamental interconnectedness of all things.

- Focus on quantum paradoxes, time travel theory, and sofa geometry.
- President of the Pizza Appreciation Society, founding member of the Parapsychology Club.

2008 – 2011

A-Levels — Long Road College

Philosophy, Physics, and Strange Occurrences

- Achieved top marks in unorthodox reasoning and creative logic.
- Winner of the "Most Unlikely Solution" award (two consecutive years).
- Organised the annual Quantum Cat Hide-and-Seek competition.
