

University Assignment Package

Effortlessly write university assignments.

v0.1.0

2024-12-21

MIT

Utkarsh Verma

<https://github.com/UtkarshVerma/typst-university-assignment>

A clean and simple Typst template for writing university assignments.

Table of contents

I. Usage

I.1. Using this package 2

I.2. Initialising the template 2

II. Index

Part I.

Usage

I.1. Using this package

Just import it inside your typ file:

```
#import "@preview/university-assignment:0.1.0": *
```

I.2. Initialising the template

After importing, initialise the template by applying a show rule with the `#assignment()` command and passing the appropriate arguments using `with`:

```
#show: assignment.with(  
  ...  
)
```

`#assignment()` takes in the following arguments:

`#assignment({title}: none, {authors}: (), {university-logo}: none, {course}: none) [{body}]`

Argument

`<title>: none`

content | str | none

The assignment title.

Argument

`<course>: none`

content | str | none

The course name.

Argument

`<authors>: ()`

array

Authors of the assignment. Each author must be specified as a `dictionary` with the following keys:

- name: content | str
- email: str,
- student-no: content | str,

Argument

`<university-logo>: none`

content | none

The university logo passed as an image using `#image()`. If provided, it will be rendered on the first page.

Part II.
