Motivation

Motivation

- ▶ Typst is great
 - ▶ Polylux for creating presentations
 - ▶ HM theme, because logos and colors are nice
-
- ▶ This slide is using the standard `#slide` command

Project Status

- ▶ Early stages
- ▶ Title page and footer with HM logos
- ▶ Custom layouts and section slides

Motivation

Project Status

Layouts

Features

Content vertical aligned

- ▶ Content is centered vertically

Content is centered

Make a nice statement

The predefined layouts have the argument `hide-footer` to not show the footer on specific slides.

Split page into two columns

- ▶ Default content starts at the top
- ▶ can use `align` to center it

Uneven split

- ▶ Some short statements
- ▶ Typst is powerful
- ▶ Here we need more space for longer explanations
- ▶ When creating documents with Typst, the content is much more in focus compared to LaTeX.
