Initiation

Validate that every folio section renders correctly with complete data.

Validate that every folio section renders correctly with complete data.

Ensures reliability of the rendering pipeline before v0.0.1 release.

Ensures reliability of the rendering pipeline before v0.0.1 release.

Project Objectives

ID	Objective	Priority
OBJ-1	All 30 schema paths render	high
OBJ-2	Zero orphan cross-references	high
OBJ-3	Audit dashboard is accurate	neutral

Success Criteria

ID	Type	Criterion	Measurement	Objective
SC-1	project	All sections render without crash	Compilation result → Success	OBJ-1
SC-2	product	Zero orphan count	Orphan count → 0	OBJ-2
SC-3	benefit	Audit matches schema	Field count → 30	OBJ-3

Stakeholder Register

ID	Name / Role	Organization	Interest	Influence	Engagement
SH-1	Lead Developer — Package Author	folio	high	high	Daily development
SH-2	QA Reviewer — Tester	folio	high	medium	Fixture review

Assumptions Log

ID	Type	Description	Status	Risk
A-1	assumption	Typst 0.14.2+ is the floor	Validated	-
A-2	constraint	No runtime dependencies beyond gantty	Open	-
A-3	dependency	Brand presets ship before sections	Invalidated	R1

Planning

Project Boundaries (Scope)

In Scope

- Schema validation
- Cost computation
- Cross-ref detection
- Audit dashboard

Out of Scope

- Visual regression
- Multi-language support

Requirements Register

Core

ID	Description	Qty	Unit	Unit Cost	Priority
REQ-01	Schema field inventory COMP-1	1	module	\$5,000.00	high
REQ-02	Cost aggregation engine	1	module	\$3,000.00	high

Subtotal: \$8,000.00

Validation

ID	Description	Qty	Unit	Unit Cost	Priority
REQ-03	Orphan detection	1	feature	\$2,000.00	medium

Subtotal: \$2,000.00

Testing

ID	Description	Qty	Unit	Unit Cost	Priority
REQ-04	Test fixtures	4	files	\$500.00	high

Subtotal: \$2,000.00

Milestones

Date	Milestone	Status
May 01, 2026	Phase 1 Complete	Done
May 15, 2026	Phase 2 Complete	Pending
Jun 01, 2026	v0.0.1 Release	Pending

Budget Details

Core

ID	Description	Qty	Unit	Unit Cost	Total
BUD-01	Schema & compute development (REQ-01)	1	module	\$8,000.00	\$8,000.00
BUD-02	Validation engine (REQ-03)	1	module	\$2,000.00	\$2,000.00

Category subtotal: \$10,000.00

Testing

ID	Description	Qty	Unit	Unit Cost	Total
BUD-03	Test infrastructure (REQ-04)	4	fixtures	\$500.00	\$2,000.00

Category subtotal: \$2,000.00

Additional Costs

Description	Amount
Contingency (10%)	\$1,200.00
Documentation overhead	\$1,000.00

Line Items Subtotal

\$12,000.00

Additional Costs

\$2,200.00

Grand Total

\$14,200.00

Gantt Chart

Quality Plan

Standards

- Typst 0.14.2+ compatibility
- Zero-crash guarantee

Acceptance Procedure

All fixtures compile without errors. Audit-style passes.

Testing Strategy

Compile-based: just test runs typst compile on all examples and fixtures.

Quality Criteria

Requirement	Criterion	Method
REQ-01	Schema covers all 30 paths	Field count in audit
REQ-03	No false-positive orphans	Cross-ref fixture test

Communication Plan

What	Audience	Frequency	Channel	Owner
Progress update	Self	Daily	Commit log	Developer
Release announcement	Users	Per release	GitHub	Maintainer

Risk Management Strategy

Approach

Identify risks early. Mitigate before implementing dependent features.

Risk Categories

- Technical
- Scope
- Dependency

Thresholds & Scoring

Scoring: 3×3 probability × impact

Tolerance: No High×High unmitigated.

Escalation threshold: Any blocking risk pauses the sprint.

Compliance Register

ID	Regulation	Jurisdiction	Requirements	Status
COMP-1	Typst Package Guidelines Audit: Apr 20, 2026	Typst Universe	REQ-01	Compliant
COMP-2	MIT License compliance	Global	—	Compliant

Project Team

Role	Name	Contact
Developer	folio Author	dev@folio.dev
Reviewer	QA Bot	qa@folio.dev

Execution

Status Report

Overall Health

Good

Budget Spend

40%

Schedule Variance

0d

Executive Summary

Phase 1 foundation complete. Compute layer validated.

Risk Matrix

ID	Risk	Mitigation	Probability	Impact	Status
R1	Brand presets delay sections	Parallelize phases 2 & 3 From assumption: A-3	Low	Medium	Monitoring
R2	Typst breaking change in 0.15	Pin compiler version Affects: T3? Blocks: M3	Low	High	Open

Issue Log

ID	Issue	Owner	Status
I1	Audit double-counts nested fields Blocks: M1	Developer	Resolved
I2	Budget extra_costs edge case Blocks deliverable: D1	Developer	In-Progress

Change Log

ID	Change Description	Type	Affects Baseline	Approval
C1	Added compute.typ to architecture	scope	baselines.scope	Approved
C2	Deferred visual regression to v0.1.0	scope	baselines.scope	Approved

Decision Log

ID	Decision / Rationale	Date	Maker	Reversibility
DEC-1	Use separate compute layer instead of inline functions <i>Centralizes all cost and validation logic.</i>	2026-04-25	Developer	Type-2

	<i>Pure functions enable testing.</i> Prompted by risk: R1			
DEC-2	Keep existing schema paths instead of unified items array <i>Existing architecture is more evolved and already works.</i>	2026-04-28	Developer	Type-1

Deliverables Register

ID	Description	Owner	Due Date	Requirements	Status
D1	compute.typ module	Developer	2026-05-01	REQ-02	Accepted
D2	Test fixture suite	Developer	2026-05-05	REQ-04	In-Progress
D3	SCHEMA.md documentation	Developer	2026-05-07	REQ-01	Planned

Closure

Lessons Learned

Category	What went wrong	Recommendation
Architecture	Inline compute logic was scattered across components	Centralize all compute in a single module
Testing	No fixture for empty data existed	Always create boundary-condition fixtures first

Acceptance Records

Deliverable	Accepted By	Acceptance Date	Outstanding Issues
D1	Developer	May 01, 2026	None

Benefits Review

Objective	Claimed Benefit	Actual Outcome	Variance	Root Cause
OBJ-1	All 30 paths render	All 30 paths render successfully	0%	Schema was already complete
OBJ-2	Zero orphans	Zero orphans detected	0%	—

Project Handover

Documentation Handed Over

- SCHEMA.md — field reference
- MANIFEST.md — design philosophy
- README.md — quick start

Training

Self-documented via examples and fixtures.

Support / Warranty

GitHub Issues for bug reports.

Transfer date: Jun 01, 2026

Financial Closure

Budget Baseline	Final Cost	Variance
\$13,100.00	\$12,500.00	\$-,600.00

Variance Explanation

Test fixture development was faster than estimated.

Outstanding Invoices

None.

Formal Sign-Off

Stakeholder	Role	Date/Signature
