...

In a right triangle, $AC^2 = AB^2 + BC^2$.
With $AB = 5$ and $BC = 12$, we get $AC = 13$.

Clear — so $AC = 13$ is the hypotenuse.

Y

Yanis

And if a side is missing? Just isolate it.

$$b = \sqrt{c^2 - a^2}$$

. Same idea for any right triangle.
