AGENDA

Getting Started	3
Using the theme	4
Structuring a slide	5
Type scale, at a glance	7
Columns	10
Citations	11
Bibliography	12
Lorem Ipsum	13
Subheading	16

GETTING STARTED

USING THE THEME

Everything starts with one call to `#show: slides.with(..)` at the top of your document. Pass your metadata once, then write plain markup underneath. No need to memorize custom function calls.

```
#show: slides.with(  
  title: "My Talk",  
  subtitle: "A subtitle",  
  author: "Your Name",  
)
```

Heading level does the layout work for you: a level-1 heading (=) opens a full-bleed section divider, and a level-2 heading (==) starts a new titled slide. Regular text flows underneath until the next heading.

STRUCTURING A SLIDE

Bullets, numbers, and definitions all inherit the accent color automatically:

- Bullets for quick, unordered points
 - Numbered lists for anything sequential
1. Write your outline as headings
 2. Fill in content underneath each one
 9. You can also manually specify numbers.

Section A level-1 heading. Renders as a divider slide.

Slide A level-2 heading. Renders as a titled content page.

Subheading A level-3 heading. Renders as a subheading on the current page.

TYPE SCALE, AT A GLANCE

Every text size in the theme derives from one font-size and a 1.25× step, so changing one number rescales the whole deck consistently.

Role	Multiplier	Size at 20pt
Fine print	× 0.64	12.8pt
Captions	× 0.80	16pt
Body text	× 1.00	20pt
Lead-ins	× 1.25	25pt
Headings	× 1.56	31.3pt
Display	× 1.95	39.1pt
Titles	× 2.44	48.8pt

$$s_n = s_0 \times 1.25^n$$

Figure 1: The formula behind the previous table.

```
#figure(  
  $ s_n = s_0 times 1.25^n $,  
  caption: [The formula behind the previous table.],  
)
```

Listing 1: Figure calls are set on their own slide.
Swap this out for your own diagrams and screenshots.

COLUMNS

Divide a slide into columns using the standard function calls:

```
#columns(2)[  
  Some text here.  
]
```

Insert manual column breaks with:

```
#colbreak()
```

You can insert images, figures, diagrams and the like as per normal.

CITATIONS

Citations are handled as per normal, e.g. (Smith, 2020).

Insert a bibliography by calling the standard function:

```
#bibliography(style: "apa", "refs.bib")
```

The template will automatically format the bibliography as its own slide with a smaller font and hanging indent (Doe & Roe, 2019).

LOREM IPSUM

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aequale doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere malum nobis opinemur. Quod idem licet transferre in voluptatem, ut postea variari voluptas distinguere possit, augeri amplificarique non possit. At etiam Athenis, ut e patre audiebam facete et urbane Stoicos irridente, statua est in quo a nobis philosophia defensa et collaudata est, cum id, quod maxime placeat, facere possimus, omnis voluptas assumenda est, omnis dolor repellendus. Temporibus autem quibusdam et aut officiis debitis aut rerum necessitatibus saepe eveniet, ut et voluptates repudiandae sint et molestiae non recusandae. Itaque earum rerum defuturum, quas natura non depravata desiderat. Et quem ad me accedis, saluto: 'chaere,' inquam, 'Tite!' lictores, turma omnis chorusque: 'chaere, Tite!' hinc hostis mi Albucius, hinc inimicus. Sed iure Mucius. Ego autem mirari satis non queo unde hoc sit tam

insolens domesticarum rerum fastidium. Non est omnino hic docendi locus; sed ita prorsus existimo, neque eum Torquatum, qui hoc primus cognomen invenerit, aut torquem illum hosti detraxisse, ut aliquam ex eo est consecutus? – Laudem et caritatem, quae sunt vitae sine metu degendae praesidia firmissima. – Filium morte multavit. – Si sine causa, nollem me ab eo delectari, quod ista Platonis, Aristoteli, Theophrasti orationis ornamenta neglexerit. Nam illud quidem physici, credere aliquid esse minimum, quod profecto numquam putavisset, si a Polyaeno, familiari suo, geometrica discere maluisset quam illum etiam ipsum dedocere. Sol Democrito magnus videtur, quippe homini erudito in geometriaque perfecto, huic pedalis fortasse; tantum enim esse omnino in nostris poetis aut inertissimae segnitiae est aut fastidii delicatissimi. Mihi quidem videtur, inermis ac nudus est. Tollit definitiones, nihil de dividendo ac partiendo docet, non quo ignorare vos arbitrer, sed ut ratione et via procedat oratio. Quaerimus igitur, quid sit extremum et ultimum bonorum, quod omnium philosophorum

sententia tale debet esse, ut eius magnitudinem celeritas, diuturnitatem allevatio consoletur. Ad ea cum accedit, ut neque divinum numen horreat nec praeteritas voluptates effluere patiatur earumque assidua recordatione laetetur, quid est, quod huc possit, quod melius sit, migrare de vita. His rebus instructus semper est in voluptate esse aut in armatum hostem impetum fecisse aut in poetis evolvendis, ut ego et Triarius te hortatore facimus, consumeret, in quibus hoc primum est in quo admirer, cur in gravissimis rebus non delectet eos sermo patrius, cum idem fabellas Latinas ad verbum e Graecis expressas non inviti legant. Quis enim tam inimicus paene nomini Romano est, qui Ennii Medeam aut Antiopam Pacuvii spernat aut reiciat, quod se isdem Euripidis fabulis delectari dicat, Latinas litteras oderit? Synephebos ego, inquit, potius Caecilii aut Andriam Terentii quam utramque Menandri legam? A quibus tantum dissentio, ut, cum Sophocles vel optime scripserit Electram, tamen male conversam Atilii mihi legendam putem, de quo Lucilius: 'ferreum scriptorem', verum, opinor, scriptorem

tamen, ut legendus sit. Rudem enim esse omnino in nostris poetis aut inertissimae segnitiae est aut in dolore. Omnis autem privatione doloris putat Epicurus terminari summam voluptatem.
