Dramatis Personae

Nerds

Alice — *A Nerd called Alice* — Andrea
Cedric — *Another Nerd* — Celine

Jocks

Bob — *A jock named Bob, played by Boris* — Boris

Xaver

Act I – The introduction

Scene 1 – The first scene

Alice: This is a dialogue.

Bob: Indeed it is. It can go on for a while. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magnam aliquam quaerat voluptatem. Ut enim aeque doleamus animo, cum corpore dolemus, fieri tamen permagna accessio potest, si aliquod aeternum et infinitum impendere. *(Alice is growing annoyed at the nonsense)* You are annoyed? Good thing you put that in parentheses, so I can more easily understand in-line stage directions.

Alice: *(sceptic)* I'd rather wear my emotions on the sleeve, and put them right behind my name.

Bob gestures around. It is a highly complex gesture, that effectively demonstrates the method of creating blocked stage directions.

Bob: The command takes an optional parameter: 'blocked'. If 'blocked' is false, it looks like this: *He gestures around in a surprising lack of parentheses.*

Alice: Instead of having to write "#speaker" and "#stage-direction" all the time, we can import these names with dedicated aliases:

Alice uses some magic and imports the command with a new name.

Bob: We can also define functions for our names, so we don't have to write them out all the time.

Alice: *(Relieved)* This is much better.

Scene 2 – Another scene

Alice and Bob appear on stage.

Alice: We are in a new scene. At the top of the page our names appear.

Both: How curious.

Alice: Bob appears on top, even though he doesn't have his own line, because he was *tagged* as a speaker in the line spoken by both of us.

Loudspeaker: Please fasten your seatbelts.

Alice: The loadspeaker is not a real character, by tagging its line with "false", we avoid it appearing on top of the page or in the Dramatis Personae. It is more like a prop, actually. Speaking of which…

Alice takes out her screwdriver and disassembles the loadspeaker.

Alice: See what I did there? Scroll down, the props show up in a prop list.

Act II – And now?

Scene 1 – A last scene

Bob: There is so much more to do. *But what exactly??* While editing, it can be useful to have these notes.

Alice: They also show up at the end of the document, in their dedicated list. You can click on them, to go back here.

Bob: There are many options to play around in the `#show: theatre.with(...)` block at the start of the page. Almost all of these options are set to their default values, so you can remove them if you want to. *Change some default values*

Scene 2 – Or is there more?

Cedric: I'm here too, and I will show up in the Dramatis personae

Xaver: Me too, but without a description, a group or an actor, because I was not mentioned in the `#descriptions` call. But just saying something is enough to be included.

Cedric: Tell us a little poem!

Xaver:

Roses are red
Violets are blue
This text is centered
Juchu.

Cedric: Good thing you used the `centered` function instead of pure Typst alignments, this works better in different themes.

Appendix

Props:

screwdriver 5
loadspeaker 5

TODOs:

But what exactly?? 6
Change some default values 6
